# Wooden Gates

Discover the timeless beauty and durability of our wooden gates, perfect for adding a touch of elegance to any property. Whether you're looking to secure your garden, driveway, or side entrance, our range of wooden gates offers something for every need. Crafted from high-quality timber, our gates are designed to withstand the elements while providing a warm, natural aesthetic that complements any home.

# Metal Gates

Upgrade your property's security and aesthetic appeal with our premium metal gates. Our metal gates combine strength and elegance to provide a durable and attractive solution for your home or business. Crafted from high-quality steel, our gates are designed to withstand the test of time.

# Aluminium Gates

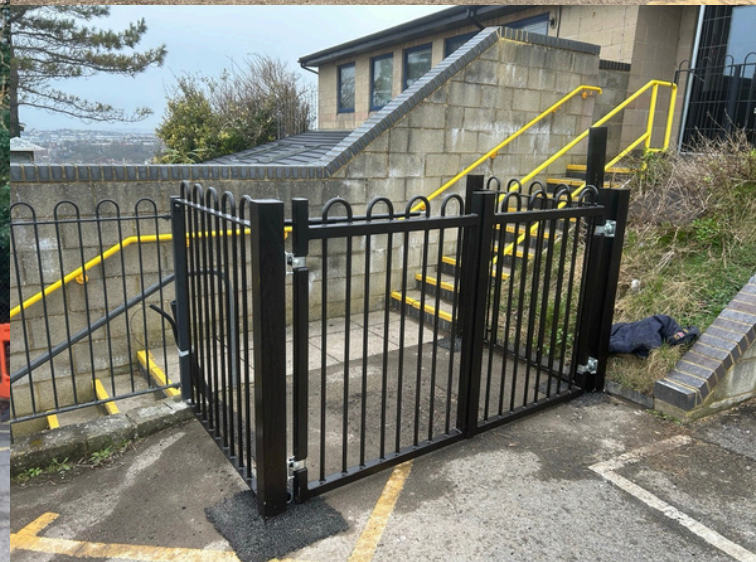

Our stylish and robust aluminium gates are the perfect combination of security and sophistication. Crafted from high-quality aluminium, these gates are designed to withstand the elements while providing a sleek, modern look that enhances any property.

# Commercial & Schools Gates & Barriers

Ideal for controlling access and protecting against unauthorized entry, these solutions offer reliability, durability, and easy operation. Enabling you to effectively manage traffic, protect valuable assets, and ensure safety for both you and members of the public. Available with modern access solutions to safeguard staff and students.

# Sliding Gates

Our sliding gate solutions are designed for smooth and efficient operation, featuring space-saving designs. With a wide range of styles, from traditional to ultra-modern, they combine aesthetic appeal with enhanced security, making them an excellent addition to any property.

# Pillars, parcelboxes and more...

We offer more than just a gateway, we consider all elements to give you the perfect finishing touches all in one place. From stunning brick walls, to bespoke signage, lighting and more...

## Garage Doors

We take care of the whole project for you, not just the gates. Take a look at the whole process below:

# Gate Automation - Roger Technology

## Why Roger Technology?

The new brushless gate motor range from Roger Technology has revolutionised the automation and security industry. With unparalleled reliability, non-stop duty cycle across the range and incredible mechanical quality the brushless range of automation show that the future is here, today. Also available in high speed variants to suit a variety of setups.

## Why Choose Us?

### Why Choose Us:

Our team is trained and certified by Roger Technology, Gate Safe, and CAME Safe, ensuring the highest standards of expertise. We use only the finest materials and techniques, backed by a 2-year parts and labour warranty on all new works. We strive to understand your needs, exceed your expectations, and deliver a long-lasting asset for your home.

---

## Accreditation

We take pride in maintaining the highest standards in our industry, which is why we are accredited by the following esteemed organisations:

# Swing Gates

## BE20 SERIES

- Super Intensive Use: Capable of running non-stop.
- Ideal: For swing gates up to 4.0m per leaf.
- Safe: The encoder management allows a precise and safe control of slowdown when opening and closing.
- Strong: Features a sturdy aluminium base treated with anti-corrosive paint and a reliable Roger Brushless motor, mounted in dedicated housings and bearings.
- Equipped with a release lever and an easy to operate the lock.
- Convenient: Battery back up available.

# Swing Gates

**ROGER**  
BRUSHLESS

## BR21 SERIES

- The Roger Technology BR21 underground electric gate kit is our best seller thanks to its twin bearing 1000kg load capabilities. This below ground gate kit can automate leaves up to 5.0m length dependant on gate construction.

<b>PERFECT FOR</b> GATE WINGS	 3.0m Solid Gates	 4.0m Iron Gates	 5.0m Farm Gates
	 In windy areas, reduce the above by 15%		

# Sliding Gates

## BH30 SERIES

### Electric Motor Features

- Ideal: For sliding gates
- Safe: The encoder management allows a precise and safe control of slowdown when opening and closing.
- Practical: Automatic programming, via the learning function of the control unit.
- Quick: Ease of installation, and start up due to its simple functions and its height and depth adjustments.
- Strong: Features a sturdy aluminium base treated with anti-corrosive paint and a reliable Roger Brushless motor, mounted in dedicated housings and bearings.
- Equipped with a release lever and an easy to operate lock.
- Convenient: Battery back up available.
- Suitable systems available for both domestic and commercial gates.

# Entry Controls

When it comes to ensuring the security and convenience of an automated gate system, choosing the right entry controls is critical. These controls play a pivotal role in regulating access, enhancing security, and providing ease of use for authorized personnel. From traditional keypad entry systems to advanced facial recognition and smartphone integration. Entry control solutions vary widely to meet different needs and preferences

Remote Control Access: With a remote control, users can open the gate from a distance, offering convenience, especially for vehicle access.

Gateway entry loop: also known as a vehicle detection loop, serves the purpose of detecting the presence of vehicles approaching the gate, thus triggering the gate to open automatically. These can be used for entry or exit through the gateway and can also be installed with a timer to only allow entry during a specific timeframe.

Timed entry/exit buttons: This feature is particularly useful for deliveries, visitors, or maintenance personnel, providing a balance between convenience and security. These can be programmed to open the gates during set times throughout the week.

Keypad Entry Systems: One of the most common methods, keypad systems require users to enter a predetermined code to gain access. They are simple to use and can be easily reprogrammed.

Smartphone Integration: Modern systems can be integrated with smartphones, allowing users to control the gate via an app. This method offers remote access and real-time monitoring.

Proximity cards: are contactless smart cards used for access control. When you hold the card near a reader, it emits the stored ID number, which the reader verifies against an access control system. If the ID matches, the system grants access. These can be highly effective in high traffic buildings like commercial properties, schools, and colleges.

# Audio and Video Intercoms

Both types of intercom systems are widely used in residential properties, apartment buildings, and commercial settings to enhance security and convenience. They help verify the identity of visitors and communicate without physical contact, providing peace of mind to property owners and residents.

Audio intercom system allow two-way voice communication between the outside visitor and an internal handset or mobile phone. Enabling a clear conversation with a visitor before then remotely opening the door or gate. This can be connected via cables or using wireless technology for easier installation. They can also be used for multiple properties or call points and can be programmed easily via SMS or using the corresponding App.

Video intercom systems: take things step further by including a camera at the entry point and a screen inside the property. This enables visual identification of visitors, adding an extra layer of security..

Discover the future of home security with **Akuvox Video** Intercom. Combining cutting-edge technology with sleek design, our video intercom system offers high-definition video, crystal-clear audio, and seamless connectivity. Whether you're at home or on the go, you can easily communicate with visitors and grant access with just a touch. With features like motion detection, night vision, facial recognition and remote access via our intuitive app, Akuvox ensures your property is safe and secure.

# Servicing and Maintenance

Regularly servicing an automated gateway is crucial for safety, as it ensures the gateway functions properly and reduces the risk of accidents. It enhances reliability by fixing issues early, ensuring smooth operation and extending the gateway's lifespan, making it cost-effective by preventing expensive repairs, keeping your investment in top condition while offering peace of mind.

Servicing and repair available for new and existing gate systems!

We also offer a comprehensive service package, with a simple annual payment you will receive the following....

Annual service of your gateway system in which we will:

We will remake all electrical connections within the system.

Check the enclosures and junction boxes for any debris or pest infestations.

Grease all motors and ensure good movement throughout the system.

Check the manual release mechanism is in good working order and releases easily for use in an emergency.

Ensure all safety devices and control devices are working well.

Check all aspects of the system and note any discrepancies or advisories for future visits.  
(not inclusive of any parts)

Priority callout/breakdown attendance: We hope you won't need us! But should you have any issues with your gateway you will be listed as a Priority customer – This will put you at the top of our callout list - meaning we will aim to get to you within 24 hours whenever possible. Get in touch for more information on our servicing package.

# Recommendations

Read what our clients have to say about us...

“Thank you ALL very much for the good works on our gates and a special mention for Nick this morning who took great care and showed much patience answering all the questions! It’s marvellous having working gates again and so up to date as well.” – Anonymous

“We wanted to recognise hard work, professionalism , helpfulness and courtesy of Dan and Connor who did a super job installing our gates!” – Ian and Heather

“The team at Bank House Gates were superb and I cannot recommend them more highly. The gates were installed on time and exactly as quoted with no hassle or fuss, and we are delighted with both the quality of the product and of the installation. The after sales support has been faultless too” – Adrian

“We want to thank you, your son and the other guys who worked on our gates. You all did an excellent job and the gates are amazing and a great success. We are most impressed with the whole installation including of course the name “Park Lodge” on the pedestrian gate, so thank you very much. With all good wishes.” – Parkside

“A note of thanks for the excellent work with our new gates. We are very pleased with them, strong and they look good too. Thanks must also go to your installation crew who were polite, friendly and could not have been more helpful, their attention to detail and tidiness was exemplary. A special thanks to Jack who worked for 3 days half the time in the pouring rain. They are all a credit to you. We would recommend your company every time. Many thanks again.” – Chris & Anna

“We are very happy with the gates – very impressed with the care, attention to detail and general attitude of the lads who fitted them. I would certainly recommend your company – you’ve done a great job.” – S. Clark

“Many thanks for a job well done and a great service and a pleasant, considerate company.” – Anne and Ben

“Just a quick note to say we are absolutely delighted with the gates. You and your guys have done an excellent job. Well done and thank you.” – Marco

“Owner was very happy with the job done. It’s a beautiful gate!” - Patricia
